- NOTES:
- 1) The 1970 figures represent an accumulation of installations, removals and miscellaneous additions from the start of the system to the end of 1970, the year Continuing Property Records were established. These CPR's have been maintained annually since that year. The 1970 records contains the inplant cost of poles from the initial installations to and through 1970.
  - 2) Reporting number of poles on PSC Report for 1982, Page 74, is incorrect. The figure listed is 823. This is the number of Pole Line Miles. The correct number of poles for 1982 is 6,681. Prior years' reports were in error also.
